Let's safeguard your plant's operations and strengthen competitiveness – together!

Elcoline Group

Wide resources for daily maintenance and comprehensive projects

Industrial Services Finland	SSG Sahala	Industrial Services Sweden	Turbine & Generator Services, Finland & Sweden
Industrial maintenance	Design, manufacturing and maintenance of heat exchangers	Industrial maintenance	Turbine upgrades, repairs and maintenance
Mechanical installations, electrical, automation and instrumentation work, HVAC services	Modernisation of heat exchangers, tube bundle replacements and re-tubing	Mechanical installations, electrical and automation work	Generator upgrades, repairs and maintenance, including balancing and rewinding
Manufacturing, installation and maintenance of pressure vessels and pipelines	Design and manufacturing of steam accumulators	Calibrations	Expert services and condition monitoring, control and protection systems
Workshop manufacturing and steel structures	Industrial maintenance and installations	Welding and metalworking	
Project and site management		Transport services and logistics	
		Special expertise: flood gates, fire safety development	

If you're looking for robust technical expertise and a wide range of flexible services in maintenance, workshop operations, condition monitoring and modernisation, Elcoline is the right partner for you. We ensure industrial and energy facilities remain in optimal condition.

We provide our customers with comprehensive industrial technical services that ensure continuity, safety and efficiency in production.

We are your partner for annual overhauls and other scheduled shutdowns, urgent maintenance needs, and daily maintenance and condition monitoring.

Our expertise covers mechanical and electrical installations, automation and instrumentation work, maintenance, as well as demanding welding and piping projects.

Our specialist services also include project management, site supervision, condition monitoring and fault diagnostics.

Nearly 1,000 industrial professionals serve in Finland and Sweden, as well as at contract maintenance sites around the world. We operate flexibly and swiftly, particularly in key industrial locations.

Solid, certified operations

We place great importance on work quality, safety and environmental responsibility. That's why we operate in Finland and Sweden in accordance with the following certifications:

- ISO 9001, Quality
- ISO 14001, Environment
- ISO 45001, Health and Safety

In Finland, we also hold certifications related to welding and steel assembly.

In Sweden, our turbine and generator services have been awarded the EcoVadis sustainability rating.

New services in process equipment maintenance

Elcoline Sahala heat exchangers are designed for demanding conditions. We offer comprehensive manufacturing and maintenance services for heat exchangers. We produce new units, service existing ones, and supply spare parts and installation services.

Our turbine services range from minor inspections and major overhauls to modernisations, including all necessary spare parts for steam and gas turbines.

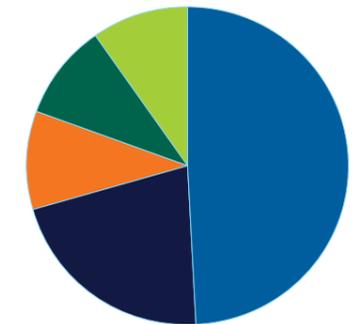

Our generator services cover a wide scope from diagnostics and overhauls to modernisations.

Control, monitoring and protection system services for turbines and generators ensure the performance of rotating main equipment.

Elcoline Anywhere is our advanced online condition monitoring system for rotating equipment.

Distribution of personnel by country and operation

Nearly one thousand industrial professionals serving customers and supporting one another:

- Industrial Services Finland
- Industrial Services Sweden
- SSG Sahala
- TGS Finland
- TGS Sweden
